

SUBJECT:

EVA Hydraulic Interlock Retrofit Kit

To all concerned Owners & Operators

Of Auger style V-Box Spreaders. Through Product Growth Development, Swenson has designed an additional feature that can be retrofit on existing EVAs. This Hydraulic Retrofit Kit will provide for the normal operation of an EVA spreader while providing a safe working environment in the maintenance or repair of the spreader.

Corrective Action:

A hydraulic interlock system was design to interrupt the flow of hydraulic fluid to the auger motor upon actuation.

Two retrofit kits have been designed for all EVA manufactured by Swenson Spreaders. These retrofit kits will consist of all parts and instructions for installation on EVA spreaders with or without feed gates.

We are currently reviewing all orders of EVA spreaders and will be contacting those customers with details on how to acquire these retrofit kits.

To install these retrofit kits, part number 00002-543-00 or 00002-543-01, for installation on EVAs' without or with feed gates respectively will need to be ordered.

Part drawing and part listings of the above mentioned kits can be seen can be seen below.
